Quarterly Journal of Microscopical Science

QH
201
Q2

EDITORS
JOHN R. BAKER, D.Sc., F.R.S.
H. G. CALLAN, D.Sc., F.R.S.

VOLUME 105. Third Series

Published for the Company of Biologists Limited
OXFORD: AT THE CLARENDON PRESS
1964

CONTENTS

Volume 105, Part 1

Shafiq, S. A. An electron microscopical study of the innervation and sarcoplasmic reticulum of the fibrillar flight muscle of *Drosophila melanogaster* 1

Doyle, W. L., and **McNiell, G. F.** The fine structure of the respiratory tree in *Cucumaria* 7

Dilly, N. Studies on the receptors in the cerebral vesicle of the ascidian tadpole. 2. The ocellus 13

Slifer, E. H., **Sekhon, S. S.**, and **Lees, A. D.** The sense organs on the antennal flagellum of aphids (Homoptera), with special reference to the plate organs 21

Lane, N. J. Elementary neurosecretory granules in the neurones of the snail, *Helix aspersa* 31

Lane, N. J. The fine structure of certain secretory cells in the optic tentacles of the snail, *Helix aspersa* 35

Lane, N. J. Localization of enzymes in certain secretory cells of *Helix* tentacles 49

Lane, N. J. Further observations on the secretory cells in the optic tentacles of *Helix*, with special reference to the results of vital staining 61

Diengdoh, J. V. The demonstration of lysosomes in mouse skin 73

Munshi, J. S. D. 'Chloride cells' in the gills of fresh-water teleosts 79

Sundararaj, B. I., and **Prasad, M. R. N.** The histochemistry of the saccus vasculosus of *Notopterus chitala* (Teleostei) 91

Williams, P. L., **Wendell-Smith, C. P.**, **Finch, A.**, and **Stevens, G.** Further uses and methods of processing fresh frozen sections of peripheral nerve 99

Sims, R. T., and **Graham, C. A.** The photographic development of coloured grains in radioautographs 107

Wigglesworth, V. B. The union of protein and nucleic acid in the living cell and its demonstration by osmium staining 113

Kahn, J. Cytotaxonomy of ticks 123

Volume 105, Part 2

McGee-Russell, S. M. On bridging the gap in cytology between the light and electron microscopes by some combined observations on snail neurones 139

Horridge, G. A., and **Mackay, B.** Neurociliary synapses in *Pleurobrachia* (Ctenophora) 163

Horridge, G. A., and **Chapman, R. A.** Sheaths of the motor axons of the crab *Carcinus* 175

Guthrie, D. M. Observations on the nervous system of the flight apparatus in the locust *Schistocerca gregaria* 183

Baillie, A. H. Ultrastructural differentiation of the basement membrane of the mouse seminiferous tubule 203

King, R. C. Further information concerning the envelopes surrounding dipteran eggs 209

Gresson, R. A. R. Electron microscopy of the ovary of *Fasciola hepatica* 213

Byrne, J. M. An electron microscopical study of neutral red granules in mouse exocrine pancreas 219

Deutsch, K., Fischer, E., and **Krause, W.** The effect of certain fixatives on particles of a globular protein: an electron-microscopical study 227

McGee-Russell, S. M., and **de Bruijn, W. C.** Experiments on embedding media for electron microscopy 231

Iversen, S. Surface reflexion interference microscopy of bull spermatozoa 245

Baillie, A. H. Esterase substrate specificity in the testis of the growing mouse 247

Marshall, A. T. Spittle-production and tube-building by cercopoid nymphs (Homoptera). 1. The cytology of the Malpighian tubules of spittle-bug nymphs 257

Dales, R. P. The coelomocytes of the terebellid polychaete *Amphitrite johnstoni* 263

Volume 105, Part 3

Robson, E. A. The cuticle of *Peripatopsis moseleyi* 281

Horridge, G. A. The giant mitochondria of ctenophore comb-plates 301

Horridge, G. A. Presumed photoreceptive cilia in a ctenophore 311

Deutsch, K., Krause, W., and **Rosenthal, S.** An electron microscopical study of isolated mitochondrial membranes treated with osmium tetroxide, potassium permanganate, and formaldehyde 319

Osborne, M. P. The structure of the unpaired ventral nerves in the blowfly larva 325

Lane, N. J. Semper's organ, a cephalic gland in certain gastropods 331

Byrne, J. M. Acid phosphatase activity in the neutral red granules of mouse exocrine pancreas cells 343

Dutt, N. H. G. The yolk-nucleus in the oocytes of *Anabas scandens* (Teleostei) 349

Nayyar, R. P. The yolk nucleus of fish oocytes 353

FitzGerald, M. J. T. The double-impregnation silver technique for nerve fibres in paraffin sections 359

Bryan, J. H. D. A silver-Schiff reaction for cytological studies: light microscope observations 363

Bryan, J. H. D., and **Brinkley, B. R.** A silver-aldehyde reaction for studies of chromosome ultrastructure 367

McGee-Russell, S. M., Smale, C. J. G., and **Banbury, W.** Two more accessories for the Huxley ultramicrotome 375

Anderson, D. S. Serial sectioning of refractory locust eggs 379

Volume 105, Part 4

Dixon, K. E., and **Mercer, E. H.** The fine structure of the cyst wall of the metacercaria of *Fasciola hepatica* 385

Ashhurst, D. E. Fibrillogenesis in the wax-moth, *Galleria mellonella* 391

Sleigh, M. A. Flagellar movement of the sessile flagellates *Actinomonas*, *Codonosiga*, *Monas*, and *Poteriodendron* 405

Marshall, A. T. Spittle-production and tube-building by cercopoid nymphs (Homoptera). 2. The cytology and function of the granule zone of the Malpighian tubules of tube-building nymphs 415

Ross, K. F. A. Nucleolar changes in differentiating myoblasts 423

Menzies, G. Observations on the development of certain cell types in the fundic region of the rabbit's stomach 449

Dogra, G. S., and **Tandan, B. K.** Adaptation of certain histological techniques for *in situ* demonstration of the neuro-endocrine system of insects and other animals 455

Fisher, A. W. F., and **Bulmer, D.** Studies of differential staining with acid dyes in the human adenohypophysis 467

Hopkins, C. R. The histochemistry and fine structure of the accessory nuclei in the oocyte of *Bombus terrestris* 475

Nimitz, M. A., and **Giese, A. C.** Histochemical changes correlated with reproductive activity and nutrition in the chiton *Katharina tunicata* 481

Butcher, R. G., Diengdoh, J. V., and **Chayen, J.** A study of the histochemical demonstration of cytochrome oxidase 497

Hally, A. D. A counting method for measuring the volumes of tissue components in microscopical sections 503
